

IN THE SPECIFICATION

Replace page 25, lines 8-18 with the following:

Example 13

N, The amino acid sequence of the protein of SEQ ID NO: 15 was analyzed for peptide sequences which correspond to HLA binding motifs. This was done using the algorithm taught by Parker et al., J. Immunol. 142:163 (1994), incorporated by reference. In the Table which follows, the amino acid sequence, the HLA molecule to which it presumably binds, and the positions in SEQ ID NO: 1 are given. The resulting complexes should provoke a cytolytic T cell response. This could be determined by one skilled in the art following methods taught by, e.g., van der Bruggen, et al., J. Eur. J. Immunol. 24: 3038-3043 (1994), incorporated by reference.
